Player 1's (WHITE) move
Eg :a7 a6
```

4. As suggested in the rule book first move will be the white pawn, The board columns are marked with alphabets from 'a' to 'h' and rows are marked from '1' to '8'.
5. Any valid move can be moved by entering the the pawn position to where you want to move
6. If the player want to move the **a7** pawn one step forward i.e to the **a6** position he should enter the start position and end position  
Ex :> a7 a6
7. If a player enters the invalid move he will be warned by asking to enter valid move and continues to notify him until he enters the valid move
8. If any player wins, the game stops displaying the corresponding players win
